Alleged Illegalities in Liquor Traffic Stopped--Girl Furnishes Information

California has been sensationalized during the last four days by wholesale raids and arrests coming from numerous alleged violations. They are declared to be the initial movement in a town cleanup by the authorities. Nineteen arrests have been made since Sunday and included in the rest two supposed speakeasies were raided. Chief of Police H. B. Lake engineered the raids, assisted by Burgess Mahaney.

The raiding started on Sunday night, when an alleged gambling joint on Third street and a speakezsy were pulled. Five were gathered in the police tolls this night from the speakeasy alone. Mrs. Fabish seemed to be in charge. -These raids led to others, until now the town is in a fever of excitement.

Tuesday night there was a descent on an alleged disorderly house conducted it was rumored by Mrs. John Lyle. She was taken together with place at the time it is asserted were ree men and two married women. and their names were secured.

One of the girls arrested in this raid-was much riled-st the treatment corded her and promptly informed of other violations. Her information led to two raids on Wednesday afternoon. CONFERENCE IN SESSION; REV. RICHARDS BUSY

With a prayer for universal peace Bishop Earl Cranston opened the pinety-first annual session of Pittsburg conference, Methodist Episcopal church at Rochester Ministers who heard the bishop's prayer, declared it was one of the most touching ever offered in the church.

The First Methodist Episcopal church was well filled when the opening session convened nearly all of the 300 members of the conference having of the best Charleroi ever presented. been present.

The principal business transacted at the morning session was the reading of a resolution by Rev. F. A. Richards of Charleroi, secretary of the board of stewards. This resolution recommended the raising of \$100,000 AIM POOR; SHOOTS in addition to the permanent annuitty fund and the appointment of a committee of ministers and laymen to take charge of the details. Plans were suggested as to the manner of raising the fund. The report was adopted, and on motion of Superintendent J. J. Hill of Blairsville district, the following committee was named: Rev. J. Soth Fisherman and Glrf With Gorgeous Hat Displeased at Somewhat Unusual Happening.

It was Sunday evening, and the inbound Broad Ripple car was paided with a happ, but worn-out cross of pleasure seekers. On the back ; latform were a number of behermen with their rods and minnow buckets. A back seat "reserted" for smokers, but generally occupied by women contained the usual number. One of the women wore a hat that must alve been the emy of all the others. If all the feathers on it were taken from one ostrich, that unfortunate bird must be in retirement, for he certainly has no clothing left

A hook attached to a line on a tourfoot pole dangled dangerously near the preation of the milliner's art and mally caught it Unconscious of what was to come, the owner of the hat, as well as the owner of the hook and inte, rode bliss'ully along. At Sfxteenth street the fisherman started to leave the car, and as he did so the hat and about 80 cents worth of talse hair started with him

The young woman, shorn of her adornment, att-red a shrick, sprang to her feet and clawed the atmosphere wildly. Sympathetic passengers hurried to the rescue, but the hook was there to stay. Nearly two embarrassing minutes were lost before the conductor took an active part. Then he drew his pocket knife and cut the line despite the protest of its owner. The car finally proceeded, the fishermanwent on his way, muttering, and the young woman rode to the center of the city with a turtle hook and about a foot of line attached to her hat'

"That's getting the hook all right,"; said a passenger The young women looked daggersbecause everybody laughed.-Indian-

"Oh, I know him, gov'nor," was the usual answer of the older inhabitants to Mr. Smith's inquiries. "Over there he used to live, and it ain't far from here to Camden Town, where he lived when he was working in the blacking place." He was even able to find an urchin who could point out the spot where Dickens "dropped stealthily one evening, with fear and trembling, into a dark letter box up a dark court in Fleet street" the first of the "Sketches

He was especially pleased with his visit to the house where Dickens went to board after his marriage. Of this, he says:

"The place is still a delightful, typically English boarding house, kept by two of the most charming old ladies you ever saw. Dickens and his wife occupied a little tucked-up room tacked on to the back of the house. I measured the place myself and it was eight feet every way. It has one small window, looking out into the back yard. Famous London Church. The Church of St. Olave's, in Hart street. London, is one of the eight that escaped the great fire of 1666, as well as one of the most ancient of London. It is a small building with a tower that is surmounted by a vane in the form of a crown, which is said to commemorate Queen Elizabeth visit in 1554 to give thanks for her release from imprisonment in the Tower of London, and made a present of silken ropes for the bells. One of the most interesting associations is the fact of its being the burial place

Mary Lyon, when she provided for the establishment of Mount Holyoke college for girls, stipulated that all the household work in it should be done by the students. That rule was enforced rigidly up to a recent date. when the directors and faculty, feeling that the practice might have become outworn made the domestic tasks of the institution optional for the undergraduates.

But when the girls of Mount Holyoke were requested to announce their wishes on the subject, 748 of the 800 elected to continue in the tasks of sweeping corridors, washing dishes setting tables and making up beds.

There is no need to worry about the American girl, even if she does wear gowns the sight of which seems to preclude all idea of work on her part. She isn't saying much about

Hew to Kill Flies.

To clear rooms of flies carbolic acid may be used as follows: Heat a shovel or any similar article and drop thereon twenty drops of carbolic acid. The vapor kills the flies.

A cheap and perfectly reliable fig poison, one which is not dangerous to human life, is bichromate of potash in solution. Dissolve one dram, which can be bought at any drug store, in by Earl Weaver of Oil City in Buick, two ounces of water, and add a little sugar. Put some of this solution in shallow dishes and distribute them about the house.

Sticky flypaper, traps and liquid poisons are among the things to use in killing flies, but the latest, cheapest and best is a solution of formalin or Ladies' two-mile race—Won by formaldehyde in water. A spoonful of be enough to kill all the flies.

To clear the room quickly where there are many flies, burn pyrethrum powder in the room. This stupefies he flies, when they may be swept up

infallible Test, According to Promi nent Physician, is the Ability to Hold the Breath.

Dr. W. A. Schtange, in a recent number of the Roussky Vratch, explains why a healthy person can suspend breathing for from thirty to forty seconds, or, with practice, for three times as long. This depends, the doctor asserts, not on the lung capacity but upon the vigor of the heart muscle. In a word, the longer you can hold your breath the greater is your heart power, persons with weak hearts being unable to suspend their breathing for more than twenty or even ten seconds.

Doctor Schtange who is a surgeon of note, tests his patients in this novel way before giving them a general anesthetic, such as ether or chloroform. Seated in a chair, the patient swim, grasped at the sunshade, and it is instructed to take a deep inspira- supported him like a buoy. He was tion and, with the mouth closed, to hold his breath as long as he can. The longer he can hold it the less danger will there be from the anesthetic, and should he not be able to suspend his breathing for as long as twenty seconds, the anesthetic is, as the doctor says, "contra-indicated."

May Lower Price of Radium

Contracts for delivery of radium in the early months of 1915 have been entered into at a price as low as \$67.50 a milligram, and there is a widely prevalent belief that there may be a great fall in the price during the next two years. It is interesting to note that for some time after its discovery radium could be procured at less than onetenth of its present price. The demand for radium to be used for medi- no attention to the things that were cal purposes has hitherto absorbed the output, and has led to rates being quoted which are excessive and altogether artificial. Duly Explained.

Sir George Reid, the genial high commissioner for the Australian commonwealth, who has just returned from a visit to Australia, is enormously popular "down under."

When he was made a knight commander of the Order of St. Michael and St. George the people of Australia, who had known him as plain George Reid, worried him a good deal about his new dignity.

At one of his meetings a heckler called out, sarcastically:

"Say, Sir George, what does K. C. M. G.' mean?" Without a moment's hesitation the new K. C. M. G. replied:

"Keep calling me George!"

Dr. Margaret N. Sullivan, recently appointed assistant to Chief Surgeon Mooney of the City hospital in Jersey City, N. J., is the first woman to serve upon the staff.

Hereafter all the North German Lloyd steamers will have on board two Francescan nuns, who will look after the spiritual and physical needs of the women and children.

Must Show Weight or Volume. Manufacturers and packers of foods sold in packages and bottles will be required, after September 3, 1914, to show on the wrapper or label the net weight or volume of the contents, as a result of an order recently issued by the United States department of agriculture. In the case of some classes of articles the contents must be stated by numerical count where this method gives accurate information as to the quantity of food in the package. The figures given on the label must repregent the actual quantity of food, exiveive of wrappings and container.

Wisconsin Agricultural Professor Shows How Hundred Dollars an Acre Can Be Made.

A profit of \$100 an acre from grow-E. Kremer of the State Agricultural college of Wisconsin has been making on a four-acre tract near Madison.

Catnip, houeset, spearmint, peppermint, sage, horehound and tanny are some of the drug weeds which Professor Kremer found could be grown with profit. For all these there is a steady market, and they can be grown with no more care or attention than ordinary timothy hay. While the latter is high at one cent a pound, the leaves of the drug-weeds, when properly dried and cured, may be sold for from three to eight cents a pound.

Spearmint is one of the many weeds ordinarily neglected which Professor Kremer finds can be grown with profit. Manufacturers of chewing gum and other commodities use large quantities and it can be grown on wet, soggy ground which is useless for any other purpose.

The finest quality of camip can be sold for eight cents a pound, while sage and peppermint present good possibilities of profit. The honeset is a wild plant usually growing in marshy ground. It may be planted broadcast like timothy and the dried plants are worth from five to six cents a pound.

Where Courtesy is a Crime.

The serio-comic difficulties which the Germans created for themselves in Alsace, one of the provinces wrested from France, seem unending. A flower fete near Strassburg was ordered abandoned because some charitable persons gave red carnations, others cornflowers—the favorite flowers of the old emperor—and others, again, some white blossoms. This combination, chosen as a delicate courtesy, made the French tri-color, and accordingly was declared criminal by the head of the Alsatian government, since any display of foreign colors is now forbidden there. Soon children with red hair, blue eyes and white teeth will be ordered executed.—Utica Globa.

Drug to Increase Height.
